Partnerships

Indraloka partners with community organizations, educators, health care providers and other nonprofits to present programs and events that serve children and adults of all ages and abilities.

Michaela Moore
Presenting theater workshops for special needs children, ages 6-12. Children learn and create in a safe environment, free of judgment and competition, and perform for supportive audiences of educators and farm animals.

Catholic Social Services and the University of Scranton
Participants tour the sanctuary, visit with the animals and learn about the environment.

NEPA Youth Shelter
For teens, ages 14 through high school graduation. STEAM learning classes and safe-space bonding experiences designed to empower young people who are affected by homelessness.

Christopher Gebiya
Creating drum circles that help create community within the natural beauty of the sanctuary.

The Wright Center for Community Health
Hosting events that help health care workers enjoy a fun and relaxing environment.

Anthony Wojnar
Presenting Reiki classes to help harness the body’s natural ability to support its own healing processes.

Pennsylvania Distance Learning
Virtual field trips and classroom activities.

Ryan's Case for Smiles
Bringing virtual visits from the sanctuary’s farm animals to children who are hospitalized for cancer treatment and other life-changing illness.

Nativity Miguel School
Hosting field trips.

Children’s Advocacy Center (CAC)
Providing healing space for the therapists and support staff of CAC to help in dealing with intense workloads that often address abuse and other difficult topics. Engaging the animals to work with youth clients, many of whom exhibit anger, to teach them ways to be gentle and kind to others and themselves while processing their their distressing circumstances.

Count-Appointed Special Advocates for Children (CASA)
Providing safe, fun space for youth and their advocates to bond, learn and heal in the company of rescued farm animals who have also overcome abuse and learned to trust again.
